DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 0887701 (EP'701).

A thermally processed image forming material containing a fatty acid silver salt has been known in EP'701. Note especially to page 2, lines 49-52; page 3, line 19-36; page 4, lines 35-page 5, line 2; page 10, lines 43-45; page 12, line 19-line 27; page 16, lines 35-49; page 20, lines 42-46; Tables 1-2 page 29-29, Table 3, page 30-31. The organic silver dispersion was made from behenic acid and stearic acid. The material of EP'701 and that of the present claimed invention contains same fatty acid made with similar process. Accordingly, the invention as claimed lacks novelty. Alternatively, it would have been prima facie obvious to the worker of ordinary skill in the art to use a known process of forming fatty acid silver to provide an invention as claimed. "(E)ven though

product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same or obvious from a product of prior art, the claim is unpatentable even though the prior art product was made by different process." In re Thorpe 777 F.2d 695, 698, 227 USPQ 694, 966 (Fed. Cir. 1985).

3. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over EP'701 as applied to claims 1-9 above, and further in view of WO97/34196 (WO'196) and EP'433.

The nucleating agent in claim 10 has been known in EP'433 on pages 6-13 and WO'196 on page 5. It would have been obvious to the worker of ordinary skill in the art to improve the image contrast of the material of EP'701 by incorporated therein the nucleating agent taught in WO'196 or EP'433 to provide the invention as claimed.

Conclusion

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thorl Chea whose telephone number is (703) 308-3498. The examiner can normally be reached on M-F (9:30 - 6:00).
